Schools Install ezRoom Bundle at Record Pace

With more than 1,000 installed, ezRoom proves to be a sophisticated yet easy-to-use solution for integrated classroom control

WOODBURY, MN, Oct. 14, 2008 — [Calypso Control Systems](#) has shipped more than 1,000 [ezRoom Classroom Bundles](#) in the first three months of availability. Since its introduction in May 2008, the easy-to-use and install ezRoom bundle has proven itself as an effective and affordable solution for helping schools create learning environments where technology drives the lesson plans.

A first of its kind, the ezRoom bundle addresses K-12 classroom technology needs with easy-to-use products designed for seamless integration and hassle-free installation. Comprised of state-of-the-art control, interface, audio and connectivity products, the ezRoom bundle can be combined with projector, screen and A/V source devices to achieve 21st Century classroom environments.

The ezRoom bundle brings together the pieces in a pre-assembled package designed for hassle-free installation and start-up. The solution reduces the installation time and takes the guess work out of piecing together parts from multiple manufacturers.

“Prior to ezRoom, it was a time consuming and complex process to integrate the various technology pieces together,” said David H. Parish, Ph.D., president of Calypso Control Systems. “With ezRoom, school districts and AV dealers can quickly and reliably begin to incorporate technology into the classroom.”

After three months and more than 1,000 installs, the ezRoom bundle has established a proven track record among teachers and administrators as a sophisticated yet easy-to-use control solution that seamlessly manages and incorporates information from multiple A/V sources into daily lesson plans.

Currently shipping, the ezRoom Classroom Bundle has a starting price of \$1,999. For more information, please visit www.calypsocontrol.com or call (715) 381-9646.

About Calypso Control Systems

Calypso Control Systems, headquartered in Woodbury, MN, is a manufacturer of a full range of open architecture control, user interface, audio, microphone and connectivity products designed to create integrated classroom solutions for teachers, students and administrators.
